Land Monitoring Workflow

http://emanuele79.livejournal.com/

***Abstract*—The Land Monitoring RO allows to monitor urban, built-up and natural environments in order to identify certain features and anomalies or changes over Areas of Interest.**

I. Introduction

This document provides a paper-style view of the Research Object (RO) "*Land Monitoring Workflow*"[1] generated . The RO has been created, managed and preserved via ROHub platform [1]. Please refer to [2] for a general introduction to the RO concept, to [3] for a detailed description of the RO model, and to [4] for more information about ROHub platform.

The RO is of type *"Basic", which represents a general aggregation of related resources.* [2].

An overview of this RO is depicted in Figure 1. In summary, the hypothesis of this work is described in *Land_Monitoring_Workflow_hypothesis.docx*[3]; Additionally, this RO has been enriched automatically with the following annotations:

- concepts (most frequently mentioned in the RO): *MISSION, Products, Level, Reason, results, Sentinel, Segment, Date*
- domains (fields of knowledge in which the main concepts are commonly used): *military*
- frequent expressions (most frequently mentioned noun phrases): *change detection, image processing algorithm, small sample size, image archive, Synthetic aperture radar, SAR-based technique*
- named entities (most frequently mentioned):
  - Places: *French Guiana*

II. Resources

The resources encapsulated by the RO are summarized in table I

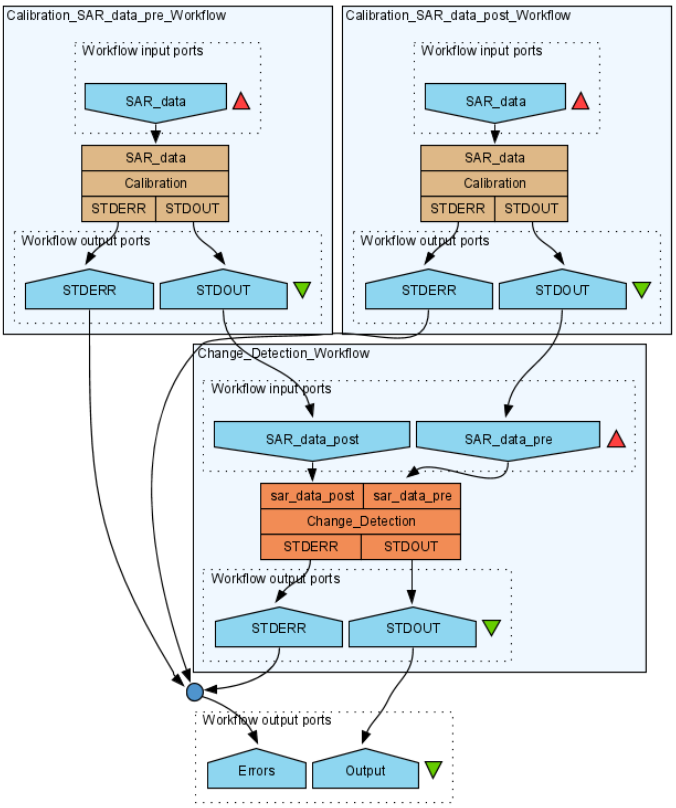

Fig. 1. Research Object Sketch

TABLE I
Research Object Resources

name	size	type
ChangeDetectionWorkflowChain.png	52.9 KB	Sketch
LandMonitoringWorkflow.t2flow	25.1 KB	Workflow
CalibrationWorkflow.t2flow	6.5 KB	Workflow
ChangeDetectionWorflow.t2flow	7.0 KB	Workflow
Sentinel-1_User_Handbook.pdf	3.0 MB	Document
Land_Monitoring_Workflow_hypothesis.docx	11.8 KB	Hypothesis
Land_Monitoring_Workflow_conclusions.docx	11.2 KB	Conclusions

Acknowledgment

The Research Object was uploaded to ROHub by *http://emanuele79.livejournal.com/*. ROHub portal development was supported by EVER-EST EU project (HORIZON 2020 grant 674907).
