

# Mogi model (1958)

Elisa Trasatti

**Abstract**—This is the Mogi (1958) model. Fortran code.

**Index Terms**—volcanoes, model, isotropic source, mogi

## I. INTRODUCTION

This document provides a paper-style view of the Research Object (RO) “Mogi model (1958)”<sup>1</sup> generated. The RO has been created, managed and preserved via ROHub platform [1]. Please refer to [2] for a general introduction to the RO concept, to [3] for a detailed description of the RO model, and to [4] for more information about ROHub platform.

The RO is of type “Code-centric”, which represents an aggregation of related resources where scripts (e.g., Python, R, Matlab) play the central role.<sup>2</sup>

An overview of this RO is depicted in Figure 1. Additionally, this RO has been enriched automatically with the following annotations:

- concepts (most frequently mentioned in the RO): *models, system*
- domains (fields of knowledge in which the main concepts are commonly used): *volcanology*
- frequent expressions (most frequently mentioned noun phrases): *deformation model, seismic hazard, volcano deformation model*
- named entities (most frequently mentioned):
  - Places: *United Kingdom*

Fig. 1. Research Object Sketch

## II. RESOURCES

The resources encapsulated by the RO are summarized in table I

<sup>1</sup>[http://sandbox.rohub.org/rodl/ROs/Mogi\\_model/](http://sandbox.rohub.org/rodl/ROs/Mogi_model/)

<sup>2</sup>See RO types definitions at <http://w3id.org/ro/earth-science#>

TABLE I  
RESEARCH OBJECT RESOURCES

name	size	type
mogi.f	1.1 KB	Workflow
galland-eps1-2012-figura-2.jpg	272.6 KB	Sketch

## ACKNOWLEDGMENT

The Research Object was uploaded to ROHub by *Elisa Trasatti*. ROHub portal development was supported by EVEREST EU project (HORIZON 2020 grant 674907).
