Interferogram over the Etna generated with DIAPASON

***Abstract*—This is the result of DIAPASON Service invoked via Jupyter**

I. Introduction

This document provides a paper-style view of the Research Object (RO) "*Interferogram over the Etna generated with DIAPASON*"[1] generated . The RO has been created, managed and preserved via ROHub platform [1]. Please refer to [2] for a general introduction to the RO concept, to [3] for a detailed description of the RO model, and to [4] for more information about ROHub platform.

The RO is of type *"Basic", which represents a general aggregation of related resources.* [2].

Additionally, this RO has been enriched automatically with the following annotations:

- concepts (most frequently mentioned in the RO): *Etna, result*
- domains (fields of knowledge in which the main concepts are commonly used): *musical instruments*
- frequent expressions (most frequently mentioned noun phrases): *result of DIAPASON Service, Interferogram over the Etna*
- named entities (most frequently mentioned):
  - Places: *Etna*

II. Resources

The resources encapsulated by the RO are summarized in table I

TABLE I
Research Object Resources

name	size	type
amp_9870_10045_ortho.tiff	2.0 MB	
coh_9870_10045_ortho.tiff	2.0 MB	
pha_9870_10045_ortho.tiff	508.5 KB	
logs.zip	34.5 KB	

Acknowledgment

ROHub portal development was supported by EVER-EST EU project (HORIZON 2020 grant 674907).
