

EVER-EST4GSNL@AGU2016

Stefano Salvi

Abstract—EVER-EST presentation at AGU 2016, entitled: Improving Scientific Research for the GEO Geohazard Supersites through a Virtual Research Environment, by S. Salvi, E. Trasatti, G. Rubbia, V. Romaniello, C. Spinetti, S. Corradini, L. Merucci

I. INTRODUCTION

This document provides a paper-style view of the Research Object (RO) “*EVER-EST4GSNL@AGU2016*”¹ generated. The RO has been created, managed and preserved via ROHub platform [1]. Please refer to [2] for a general introduction to the RO concept, to [3] for a detailed description of the RO model, and to [4] for more information about ROHub platform.

The RO is of type “*Bibliographic*”, which is intended mainly for the aggregation of bibliographic resources, bibliographic references, or documents (e.g., grey literature) that are a relevant to a specific topic.²

Additionally, this RO has been enriched automatically with the following annotations:

- concepts (most frequently mentioned in the RO): *Environment, presentation*
- domains (fields of knowledge in which the main concepts are commonly used): *ecology*
- frequent expressions (most frequently mentioned noun phrases): *virtual research environment, GEO Geohazard Supersites*

ACKNOWLEDGMENT

The Research Object was uploaded to ROHub by *Stefano Salvi*. ROHub portal development was supported by EVER-EST EU project (HORIZON 2020 grant 674907).
