

Change Detection Data Centric

EU SatCen

Abstract—Change Detection over Madrid

I. INTRODUCTION

This document provides a paper-style view of the Research Object (RO) “*Change Detection Data Centric*”¹, which is a *release* generated on 11 May 2018 from the live RO “*Change Detection Data Centric*”². The ROs have been created, managed and preserved via ROHub platform [1]. Please refer to [2] for a general introduction to the RO concept, to [3] for a detailed description of the RO model, and to [4] for more information about ROHub platform.

The RO is of type “*Basic*”, which represents a general aggregation of related resources.³

In summary, the hypothesis of this work is described in *Polarization*⁴, *MasterSentinel-1product*⁵, *AreaofInterest*⁶, *SlaveSentinel-1product*⁷; the methods used include *definition.txt*⁸; Additionally, this RO has been enriched automatically with the following annotations:

- concepts (most frequently mentioned in the RO): *Detection*
- frequent expressions (most frequently mentioned noun phrases): *Satcen 2018*, *detection over Madrid*
- named entities (most frequently mentioned):
 - Places: *Madrid*

II. RESOURCES

The resources encapsulated by the RO are summarized in table I

ACKNOWLEDGMENT

The Research Object was uploaded to ROHub by *anca popescu*. ROHub portal development was supported by EVEREST EU project (HORIZON 2020 grant 674907).
