Volcano deformation mapping

http://rapw3k.livejournal.com/

***Abstract*—Ground deformation mapping is a typical use case for this VRC. It may be carried out by different researchers on different volcanoes or even on the same volcano**

I. Introduction

This document provides a paper-style view of the Research Object (RO) "*Volcano deformation mapping*"[1] generated . The RO has been created, managed and preserved via ROHub platform [1]. Please refer to [2] for a general introduction to the RO concept, to [3] for a detailed description of the RO model, and to [4] for more information about ROHub platform.

The RO is of type *"Basic", which represents a general aggregation of related resources.* [2].

An overview of this RO is depicted in Figure 1. Additionally, this RO has been enriched automatically with the following annotations:

- concepts (most frequently mentioned in the RO): *file, velocities, ground, residuals, GPS*
- domains (fields of knowledge in which the main concepts are commonly used): *programming, telecommunications*
- frequent expressions (most frequently mentioned noun phrases): *SBAS InSAR data processing, processing method, input data Multitemporal InSAR image data, SBAS method*

II. Resources

The resources encapsulated by the RO are summarized in table I

TABLE I
Research Object Resources

name
SBAS InSAR data processing using SarScape.docx
Validation of ground velocities using InSAR ground deformation and GPS.doc
volano-def.jpg
volano-def.jpg
vel_masked2.zip
EO-Workflow.t2flow

Acknowledgment

The Research Object was uploaded to ROHub by *http://rapw3k.livejournal.com/*. ROHub portal development was supported by EVER-EST EU project (HORIZON 2020 grant 674907).
