## I. INTRODUCTION

This document provides a paper-style view of the Research Object (RO) “*VSM Campi Flegrei 2011-2013*”<sup>1</sup> generated. The RO has been created, managed and preserved via ROHub platform [1]. Please refer to [2] for a general introduction to the RO concept, to [3] for a detailed description of the RO model, and to [4] for more information about ROHub platform.

The RO is of type “*Workflow-centric*”, which represents an aggregation of related resources where scientific workflows play the central role.<sup>2</sup>

An overview of this RO is depicted in Figure 1. Additionally, this RO has been enriched automatically with the following annotations:

- concepts (most frequently mentioned in the RO): *source*, *inversion*
- domains (fields of knowledge in which the main concepts are commonly used): *programming*
- frequent expressions (most frequently mentioned noun phrases): *software tool*, *VSM tool*
- named entities (most frequently mentioned):
  - Places: *Italy*
